

Abstract Class:

```
#include<iostream>
using namespace std;
class Abstract
{
    public:
        virtual void show()=0;
};
class child:public Abstract
{
    public:
        void show()
        {
            cout<<"Hello World"<<endl;
        }
};
int main()
{
    child c;
    c.show();
    return 0;
}
```

```
db@db-OptiPlex-380:~$ g++ abstract.cpp
db@db-OptiPlex-380:~$ ./a.out
Hello World
db@db-OptiPlex-380:~$
```
